

# Essential AutoCAD Skills for Entertainment Industry Professionals

By equipping you with essential AutoCAD skills, this training empowers you to work seamlessly and handle tasks independently. Whether you're adjusting layouts, annotating drawings, or sharing designs, this course ensures you'll collaborate with your teammates more effectively, adapt quickly to changing needs, and streamline your workflows—empowering you to foster a stronger, more efficient team.

This course is designed to be completed in two days.

## Upon completion of this course, participants will be able to:

- Streamline workflows by navigating the AutoCAD interface and performing basic operations efficiently.
- Enhance file organization and communication through effective layer management and annotation organization.
- Collaborate seamlessly by exporting files and ensuring organized handovers.

## Key Topics

- Understanding file basics by navigating and managing AutoCAD files for daily tasks.
- Making layout adjustments, annotating drawings, and exporting files to enable them to perform essential edits and handle routine tasks independently.
- Organising drawings, managing layers, and streamlining file sharing to enhance workflow efficiency.

## Prerequisites

- Learners are not required to have prior experience using AutoCAD.
- This course is intended for beginners in entertainment industry.
