Master Password Re-Prompt

For any [item](#), you can activate the **Master password re-prompt** option from the Add or Edit screen to require verification of your [master password](#) to access or autofill sensitive vault items:

Fråga om huvudlösenordet

Master password re-prompt will behave slightly differently depending on which app you're using, for example:

- In the web app, browser extension, and desktop app viewing the item or editing anything about it with this enabled will require you to re-enter your master password.
- On mobile apps, only viewing hidden fields (e.g. passwords, hidden custom fields, credit card numbers) will require you to re-enter your master password. Editing anything about the item will also require you to re-enter your master password.

Users who do not have master passwords, for example those in organizations using [SSO with trusted devices](#) or [Key Connector](#), will not have the master password re-prompt option available to them. Additionally, trusted contacts using [emergency access](#) will not be required to re-enter a master password in order to view a protected vault item.

Warning

Återupppmaning av huvudlösenord **är inte** en krypteringsmekanism. Den här funktionen är ett skyddsräcke endast för gränssnitt som en sofistikerad användare kan hitta sätt att komma runt. Vi rekommenderar att **du aldrig** lämnar ditt valv olåst när det är oönskat eller på en delad arbetsstation.
