mosaic insights: GOOGLE CLOUD PLATFORM

Modernize and extend the value of disparate Systems of record to enable essential Self-Service Analytics and Machine Learning Capabilities

Mosaic Insights in Google Cloud Platform (GCP) is a contemporary data and analytics platform that extends the value of existing systems of record. CMA's *Mosaic Insights* in GCP enables cross-domain datasets to be published, orchestrated, and analyzed by authorized knowledge workers on a self-service basis, as well as the petabyte-level, machine learning capabilities of GCP's BigQuery engine.

allow authorized subscribers to access, provision, and work with the data they trust and need - when they need it

Purpose-built to orchestrate the secure publication of data from disparate environments such as Medicaid Data Warehouses, prescription drug monitoring systems, and an array of social care provider data stores, *Mosaic Insights* is a data fabric solution rich in functionality.

aggregate, enrich, and publish data sourced from disparate legacy silos in a highly secure and scalable platform

Ideal for multiple business objectives that involve a network of stakeholders requiring secure, self-service access to trusted and transparent datasets for timely dashboards, ad-hoc queries, and discovery-based analytics:

- Medicaid Policy Planning,
- Program Budgeting, Rate Setting, and Integrity functions,
- Enhanced Risk Stratification, leveraging Administrative, Clinical & Social Care Datasets, and
- Performance-Based Monitoring & Reporting in Support of Innovative Payment Arrangements.

Leveraging *Mosaic Insights* in GCP provides a highly secure and massively scalable platform to enhance ever-evolving program requirements that facilitate improved outcomes.

People You Trust. Results That Matter.
