SeeUnity Solutions for eDOCS

Integrate with eDOCS to optimize business processes - Enable efficient workflow with end-to-end governance

Fusion Content Integration is a highly configurable web-based application used to conveniently bring together all of a user's critical and relevant content into one place. Work from a single UI to effectively govern and manage content by giving users real-time secure access to eDOCS content from within external vital business applications.

Solutions for eDOCS - Key Features

- Configurable layouts and templates

- Real-time access to relevant eDOCS content

- Securely surface eDOCS content via Tabs

- Access native eDOCS features: Browse, access, search, manage, and edit content directly from a single UI

- Drag and drop documents between systems

- Copy and move documents between systems

- Email links to documents or email PDFs of documents

- Context sensitive menus offer only relevant actions

- Browse hierarchy, search full text and properties across multiple libraries

BUSINESS BENEFITS

- Enable productive collaboration with secure integration

- Work efficiently by accessing all relevant data via a single user interface

- Workflow is streamlined, saving time and speeding up business processes

- Reduce content duplication

- Maintain Information Governance initiatives by keeping content in the repository of record

- Simplify workflow and improve productivity

- Automate processes to free up valuable IT hours

- Enable and secure internal and external content collaboration

- Maintain IG and compliance with full administrative oversight

- Allows users to interact natively in eDOCS (search, edit, create, update metadata, etc.)

- Improve adoption by allowing users to work in their system of choice while keeping content synchronized and up to date

- Control and maintain storage costs

Working Behind the Scenes to Improve Productivity

Echo Content Synchronization

Echo Content Synchronization is an API-based enterprise content synchronization product that enables you to securely connect and synchronize content between eDOCS and your other external applications. Automate your team's workflow while maintaining information governance by publishing, bi-directionally syncing, or archiving content across systems.

- Schedule and automate content syncs
- Auditing, reporting, and error handling
- Automated rule and sync template creation
- Maintain audit and history data
- Delete or replace documents with a link or stub

Key Features

- Securely sync content from eDOCS to your on-premise, hybrid, and cloud applications
- Supports one-way or bi-directional, or archive sync
- Configure administrator or user initiated sync rules
- Advanced mappings for workspaces and metadata
- Configure rules to be initiated based on triggers

BUSINESS BENEFITS

- Simplify workflow and improve productivity
- Automate processes to free up valuable IT hours
- Enable and secure internal and external content collaboration
- Maintain IG and compliance with full administrative oversight
- Allows users to interact natively in eDOCS (search, edit, create, update metadata, etc.)
- Improve adoption by allowing users to work in their system of choice while keeping content synchronized and up to date
- Control and maintain storage costs
