

Microsoft Azure Government Hosting for Thomson Reuters

DATA SHEET

Anaqua now offers Microsoft Azure Government hosting for [Echo Sync](#) exclusively for Thomson Reuters clients. Allow your IT team to focus on your business without the burden and cost of maintaining in-house hardware. Your team will have access at anytime from anywhere.

By leveraging the Microsoft Azure Government environment, Echo Sync has access to a wide array of continuously improving security, storage, and monitoring solutions. This hosting solution provides flexible, powerful, and secure cloud Infrastructure as a Service (IaaS) from a growing number of data centers and network points of presence in the United States.

Microsoft Azure Government Support

Anaqua provides software and services to many clients with compliance requirements. Making Echo Sync available locally through the cloud enables client support and responsiveness through:

- **Local Private Support Model:** Dedicated support is provided by US citizen and US resident staff in a private group on our support environment
- **Data Privacy:** For many clients, where their data is stored is a critical business decision. Know that your data is stored securely in the US.
- **Flexibility:** Anaqua can provision new clients quickly. With multiple data centers along with backup centers, you are less likely to suffer a failure that prevents you from being able to do your work.

Meet the demands of compliance requirements for government entities.

Microsoft Azure Government hosting provides:

- Securely hosted environment accessible by US citizen and US resident staff only
- Dedicated US support

Each Microsoft Azure Government data center provides:

- Consistent specifications at each location
- Redundant power
- Infrastructure for cooling, battery backup, and generators
- High performance architecture
- End-to-end encryption with TLS 1.2 enforced
- Enhanced firewall restrictions to outbound traffic

These data centers are located:

- Primary: Virginia, United States;
Secondary: Texas, United States

Microsoft Azure Government

Our partnership with Microsoft Azure Government takes Anaqua's leadership position to the next level by leveraging a dedicated secure environment only accessible by US citizen and US resident staff at both Microsoft and Anaqua.

- Microsoft Azure Government meets many compliance requirements. [Learn more](#)
- Next Generation Cloud Infrastructure enables excellent flexibility in responding to our clients' diverse changing needs. When you require additional capacity, Microsoft Azure Government is able to respond to the request. This provides flexibility in provisioning both primary and backup environments faster than any time before.
- Support resources from Microsoft enable Anaqua to continue to set an industry-wide standard for solution uptime.

The Azure Government security and Azure physical security architecture documents can be found at the links below:

- **Microsoft Azure Physical Security:** <https://docs.microsoft.com/en-us/azure/security/fundamentals/physical-security>

Additional Security

Included with Azure Government hosting are the following to provide you with additional levels of security:

- **Backup and Recovery:** Clients have their data backup performed on a regular basis. Anaqua can restore data in the event of database issue or database corruption.
- **Encryption at Rest:** For the highest level of security, your data is encrypted at rest in the hosted data centers.
